Control & Automation Techniques

Mission India: Automation Everywhere

23-26 February 2009

Bangalore International Exhibition Centre (BIEC), Bengaluru, India

Exhibitor Profile

The exhibition will showcase the competency of the instrumentation & automation industry through the availability of the latest technology, products & services, the infrastructure within the easy reach of customers for application and implementation support. It will highlight the specificity of the technology in attaining world-class standards for product quality. The exhibition will mainly focus on the Control & Automation Techniques, for the following user industry sectors:

- Automobiles
- Building Automation
- Cement
- Manufacturing
- Oil & Gas
- Power
- Railways
- Retail Automation
- Robotics
- Safety & Security
- Steel & Metallurgy
- Urban Transportation Infrastructure
- Waste Water Treatment

Highlights & Scope of Exhibition

- Energy Conservation
- Environment
- Green Energy
- Non - Renewable Energy
- Energy Transmission & Distribution
- Pollution Control
- Energy Equipments & Generators
- Renewable Energy
- Water Management
- Waste Management

PRODUCT PROFILE

- Automation
- Manufacturing
- Products across Sectors
- Digital Animation
- Glass
- Engineering
- Packaging
- Tourism
- Electronics & Electricity

IETF Global provides a platform to countries interested in making a foray into the Indian market. The pavilion showcases a mix of various technologies of the participating countries thus highlighting their strengths and expertise.

Consisting of Country Pavilion/Regions/Provinces, this platform also assists in enhancing bilateral trade with India.

Some of the countries which have benefitted from such participation includes: Canada, Czech Republic, Germany, Italy, Japan, Romania, Russia, South Korea, Spain, Taiwan & UK

The 3rd International Safety, Security & Fire Exposition and Conference

Manufacturing new opportunities

Manufacturing - 2009

Manufacturing India '09 aims to bring together a diverse cross section of stakeholders in the manufacturing industry from India and overseas.

Manufacturing contributed to 78% of FDI investment, 27% of GDP & 53% of India's exports in the year 2006-07. The sector is expected to grow at 12% to 14% over the next decade.

The event will bring buyers and sellers from round the globe on a single platform to view the latest technology, products and services from leading companies, hands on equipment demonstrations & networking with industry professionals.

4th Partmart & Autocare - 2009

The Indian automotive industry has emerged as one of India's fastest growing, specialised manufacturing sectors, and truly a globally competitive one. After sales service has a significant role in this growth, as India is a price sensitive market where vehicle life expectancy is much higher than developed nations. Despite a global slowdown, the Indian car market has grown by 12.2 per cent in 2007-08.

Keeping the tremendous potential of Indian Automotive aftermarket and services industry in mind, Automotive Component Manufacturers Association of India (ACMA) jointly with Confederation of Indian Industry (CII) will be organising the 4th "Partmart & Autocare" - The Automotive Aftermarket and Services Exposition. It will be the concurrent show with 18th International Engineering & Technology Fair (IETF-2009) at BIEC, Bengaluru. The Fair provides an excellent opportunity to the automotive aftermarket players in the country as well as in the Asian region for accessing the rapidly growing Indian automotive aftermarket space.

Highlights

Conference: Conference on issues with regard to Automotive Aftermarket.

Service Head Conclave: To deliberate on the key issues related to services being provided to the end customer.

Asli Naqli: A campaign to educate the masses on the dangers of fake parts.
